

HOW TO IDENTIFY AN ORIGINAL BILSTEIN PRODUCT

STEP BY STEP

STEP 1

Scan the QR code

Scan the QR code on the packaging label or on the product label. You will be taken directly to the individual BILSTEIN product page.

STEP 2

Start product authentication

Select the authentication button on the product page. You will then be taken directly to the BILSTEIN verification page at scan.bilstein.com. There, accept the end-user licence agreement and the privacy policy, and allow access to your camera and, where applicable, your location.

STEP 3

Scan the hologram shield

Locate the hologram shield on the packaging label. During the scanning process, align the marker shown on your phone over the hologram shield.

STEP 4

Complete verification

Once the scan has been completed successfully, a green tick will be displayed. This confirms that the product is an original BILSTEIN product.

If you receive a red cross, your product could not be authenticated - please contact your dealer.

*Alternatively, you can download the CheckIfReal app. **Install CheckIfReal.**
